* ASDRD Assignment - 1

1] Choose any one application domain (e-commerce/ healthcare / college Exp / banking / food delivery) and create agile requirements using user stories and acceptance criteria.

→

Agile requirements.
Domain : Food delivery

① Product Vision:
To develop a user-friendly food delivery service application that allows customers to order food from nearby restaurants quickly, securely, and conveniently vehicle providing real-time order tracking

② Product Goal:
To provide customers with a fast, convenient and reliable food ~~from nearby restaurants~~ ordering experience

③ Product Backlog

ID	Feature	Priority
P01	login	High
P02	Browse Restaurant	High
P03	Search Food	High
P04	View Food Details	High
P05	Add to cart	High
P06	Place order.	High

P07	Online Payment	High
P08	Order tracking	medium
P09	Order History	Medium
P10	Rating & Review	Medium
P11	Fav restraunt	Low
P12	Notification	Low

④ User Stories

ID	User Story	Priority	Acceptance Criteria
U01	As a customer, I want to log in / register so that I can access my account	High	Given I am a new user, when I register with valid details. They my account should be created successfully
U02	As a customer, I want to browse nearby restaurants so that I can choose where to order from	High	Given I am logged In, when I open the restraunt page then nearby restraunts should be displayed
U03	As a customer, I want to search food so that I can find dishes quickly	High	Given a keyboard whend searched, then matching dishes appear.

THADOMAL SHAHANI TSEC ENGINEERING COLLEGE

V04	As a customer, I want to search food so that I can find dishes quickly	High	Given a keyword, when searched, then matching dishes appear.
V05	As a custom, I want to track my order so that I know it's status.	medium	given my orders is confirmed when I open tracking then it's current status should be displayed
V06	As a customer I want to rate my order so that I can provide feed back	Low	Given my order is delivered when I submit a rating, then it should be saved

2] For the user stories created is question 1, do sprint planning. story point estimation & release planning

→

1) Story Point Estimation

User story	story point	Reason
U01	3	Basic login & Registration functionality
U02	3	Restaurant visiting is relatively simple
U03	3	Requires food search functionality
U04	8	Payment requires secure payment processing and validation
U05	5	Tracking requires maintaining and displaying order status
U06	3	Rating & feedback. are comparatively simple.

Total story points
= 25 story points.

2) sprint planning:
Sprint length: 2 weeks
Development team: 5 members.
velocity: 20 story points / sprint.

Considering the dependencies between the stories the work can be divided as follows:

Sprint	User stories	Points
Sprint 1	U01, U02, U03, U04	17
Sprint 2	U05, U06	8

Sprint 1 Goal: Implement user authentication restaurant browsing, food search, secure payment functionality.

Sprint 2 Goal: Implement order tracking & customer feedback
Dependency: Authentication → Browse → search → Order payment → Tracking. → Review

3. Release Planning
Release features delivered

Release 1: login / Register, Browse restaurant. ~~Orders~~ Search Food.

Release 2: Online Payment & order tracking

ENGINEERING COLLEGE

Release 3: Rating & Feedback.

Release 2: Online Payment & order tracking
Release 3: Rating & Feedback.

Release 1: provide the basic functionality required to use the application.

Release 2 adds the main transaction & delivery. funtionality.

Release 3 adds customer feedback & improved the overall user experience.

3] Test case design using agile Quality Assurance testing

→

Agile Quality assurance involves continous testing throughout each sprint. Test cases are prepared from user stories and acceptance criteria.

Test cases for food delivery.

Test case ID	User story	Test scenario	expected
TC 1	U 01	login with valid credentials	Users should be logged in successfully.

T02	U01	login with invalid credentials.	Appropriate error message should be displayed
T03	U02	~~login with invalid credentials~~ Open Restaurant listing	Available restaurants should be displayed
T04	U03	Search for avialiable food items.	Matching food items should be displayed.
T05	U04	make payment using valid details	Payment should be successful & order should be confirmed
T06	U04	make Payment using invalid details	Payment should fail & order should not be confirmed
T04	U05	Track the confirmed order	Current order status should be displayed
T08	U06	Submit a rating	Rating / Feedback should be saved successfully
